Allowable Subject Matter

1. Claims 1-33 are allowed.

The present invention is directed to a terminal and corresponding system for managing a multimedia call in different communication networks. The closest prior art, WO 9952307 depicts a similar system: access and resource allocation in a UMTS. But the prior art fails to teach when a changing condition is detected, further, dividing the communication signal into a first component and a second component, and where one second connection between the terminals is established, and the second signal component is then transmitted through the second connection to the target terminal.

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio R Perez whose telephone number is (703) 305-8637. The examiner can normally be reached on 7:00 - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on 703-308-4825. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
